<ul style="list-style-type: none"><li>Developed a proof-of-concept (POC) project named <b>Gandalf Insight for the AWS re:Invent 2023</b><ul style="list-style-type: none"><li>Gandalf Insight is a cutting edge generative AI-powered fintech data engineering product.</li><li>My role as a frontend developer, I had built an app like a chat App where user can query about fintech data and get the response from the backend.</li></ul></li><li>Worked on <b>Quiz app (Know-It-All)</b> built using Nextjs Framework.<ul style="list-style-type: none"><li>Learned to collaborate with UIUX designer, Quality Assurance, Backend Developer and DevOps engineer.</li><li>Utilized AWS code commit as a version control system to manage and track changes to the codebase.</li><li>Project Link: <a href="https://knowitall.genesesolution.com/">https://knowitall.genesesolution.com/</a></li></ul></li><li>Worked on <b>user management module in Genese Cloud Storage Solution (GCSS)</b> using ReactJs framework in frontend.<ul style="list-style-type: none"><li>Learned to integrate React chart libraries to displayed cloud storage usage.</li><li>Learned to manipulate backed response data into frontend app.</li><li>Project Link: <a href="https://gcss.genesesolution.com/index.php/login?">https://gcss.genesesolution.com/index.php/login?</a></li></ul></li></ul>	
<b>Associate Frontend Developer</b> <b>Genese Solution Pvt. Ltd. , Lalitpur, Nepal</b>	<b>July 2022 - Dec 2022</b>
<ul style="list-style-type: none"><li>Build a <b>User Stories Generator App (POPai)</b> using Reactjs framework which enable user to write stories within a few minutes without wasting time.<ul style="list-style-type: none"><li>Implemented Authentication using AWS cognito</li><li>Integrated Stripe payment using iFrame</li><li>Integrated backend API to frontend.</li><li>Utilized version control (Git) to manage and track changes to the codebase.</li><li>Project link: <a href="https://popalpro.com/">https://popalpro.com/</a></li></ul></li></ul>	

- Integrate swagger API to build a Blog Web App in Angular framework with Typescript
- Implement Authentication flow using JWT token
- Learned to Integrate different libraries to app
- Project Link: <https://github.com/lhamo07/blog-app>

## **CERTIFICATIONS**

---

### **DEVELOPING WEBSITES AND FRONT-END WITH BOOTSTRAP**

#### **IBM**

Completed comprehensive training in Developing Websites and Frontend with Bootstrap, gaining proficiency in utilizing Bootstrap framework for efficient and responsive web development. Acquired skills in implementing Bootstrap components, grid system, and customization techniques to enhance user interface design and frontend development projects.

<https://coursera.org/share/13c4def561a0d7e7d6b5147dbf10c6f3>

### **ADVANCE REACT**

#### **Meta**

Having successfully completed the "Advanced React Development" course, I have attained proficiency in utilizing advanced React concepts and features, mastering JSX. Throughout the course, I delved into various types of React components, including advanced hooks, and gained expertise in constructing forms with React. I developed a web application that consumes API data, acquiring familiarity with React Context for global state sharing.

<https://coursera.org/share/13c4def561a0d7e7d6b5147dbf10c6f3>

### **INTRODUCTION TO FRONT-END DEVELOPMENT**

#### **Meta**

After completing the "Introduction to Front-End Development" course in the Meta Front-End Developer program, I have acquired a foundational understanding of web development and essential skills in creating interactive and visually appealing websites. This course provided a comprehensive overview of the day-to-day responsibilities of a web developer, introduced core technologies like HTML and CSS, and familiarized me with modern UI frameworks such as Bootstrap and React.
